HNP is responsible for co-ordinating all regeneration activity within the area. It does this by bringing residents and service providers together to work on key issues.

Much of this work is co-ordinated by Theme Groups (listed below) and overseen by the HNP Board, both of which are made up of residents and representatives of key agencies and service providers.

HNP is also a partner in the physical redevelopment of the area, working alongside partners such as Tameside Council, Peak Valley Housing and residential developer BASE on groups such as the Land Development Steering Group and Land Board.
